Hello Barbara and thanks for sharing your work with us.

What can I say about your work? I am really impressed with the professional quality, the aesthetical approach and with your ability to say a whole story in only one image.

From a technical point of view, there is nothing to suggest. Your images include many strong photographic qualities such as good composition, effective lighting, and interesting aesthetic quality. It's obvious to me that you have the necessary level to create images with the highest criteria. The quality of the pictures is professional 100%. Looking at your pictures I have the sense that you are shooting portraits for a long time, you are experienced and with a knowledge of this genre. The necessary elements for a single image in the single category are the technical and aesthetic quality, autonomy, narrative and, of course, originality. Your images include all these virtues and I am sure that will attract the attention of the jurors. There is a dreamy and fairytale aura in all the pictures and each one offers a unique visual experience.

Your images are single, but they shared common features especially in the aesthetical part. Your subject also is young people. This is good because it reveals that you have a personal visual style something that is important for someone who wants to go to the next level. My suggestion for you is to present us a series of photos next time. The problem now is that the jury will see and evaluate each image separately from the others. As a reviewer, I have the opportunity to see hundreds of good single images every day and I know how difficult is for a single image to stand out among others. This thing is not the same for a good series of photos. This choice would increase the value of your work because it could help us to understand better your visual style.

Dear Barbara, you are a very good photographer with a unique quality in your work. I believe that you are ready to go to the next level with your photography. Keep up the good work and I hope to see more from you in the future.

Take care.
